The DREER Nurseries

at Riverton, New Jersey

New visitors to the Dreer Nurseries, Riverton, New Jersey, invariably express surprise as to their size, diversity, and completeness. Nowhere in this country can be found a commercial horticultural establishment where such a great variety of different plants are brought together to serve the needs of the florist as well as those of the home gardener.

The Dreer establishment at Riverton is much more than just a nursery in the sense that this word is usually applied. Established in 1868, it has grown until today 13 acres are under glass including special houses for Palms, Ferns, Tropical Plants, Aquatics and many others.

For the convenience of those who have only a limited amount of time to spend, a large house has been set apart as a display house. Here a limited number of specimen plants of all the seasonable leaders are attractively grouped for inspection. This obviates the necessity of many miles of walking through the complete range of houses. Close by to the original site are the Dreer Greenhouses and Nurseries at Riverview which, though a distinct unit, are a part of the Riverton organization. The third unit is Locust Grove Farm, located less than two miles from the Riverton head office. Locust Grove Farm is noted for the production of extra fine Azaleas, Phlox, Roses, Shrubs, Climbers, and many other Dreer specialties.

An outstanding new feature of the Dreer Nursery at Riverton is the completely remade Rose Garden which has been acclaimed the finest test garden in the East. There will be another splendid display of Roses late in September, when many of the newest varieties will bloom for the first time in this section of the country.

Anyone interested in plants, but our florist friends in particular, are most cordially invited to visit the Dreer Nurseries at Riverton. No matter what time of the year, there always are many interesting things to be seen there.

May we have the pleasure of your visit? Riverton is about 9 miles from the central Philadelphia business district. It may be reached over a good highway by crossing over the Delaware River Bridge to Camden. Those who approach from Easton and westward may travel through Trenton or use the Tacony-Palmyra Bridge, which is less than three miles from the Nurseries.

DREER'S QUALITY SEEDS & BULBS

Equally as important to our florist friends are Flower Seeds and Bulbs. Close association with many successful florists enables us to understand their problems and requirements. We realize the tremendous importance of quality and know well that only special strains of superior merit can give entire satisfaction. For that reason the leading florist specialties are grown for us by competent specialists who devote most of their efforts to one or two particular crops. Through careful inspection of the growing crops we keep in close touch with the production of these specialties. All seeds are carefully tested for germination to protect our patrons to the fullest extent.

Though seeds and bulbs produced under such careful methods occasionally justify somewhat higher prices, every successful grower knows that the cost of the seeds and bulbs is very small compared with the general expenses of growing.

Dreer's Quality Seeds, Bulbs, and Plants combined with courteous and quick service will give you the finest results obtainable.

Dreer's Quality Bulbs

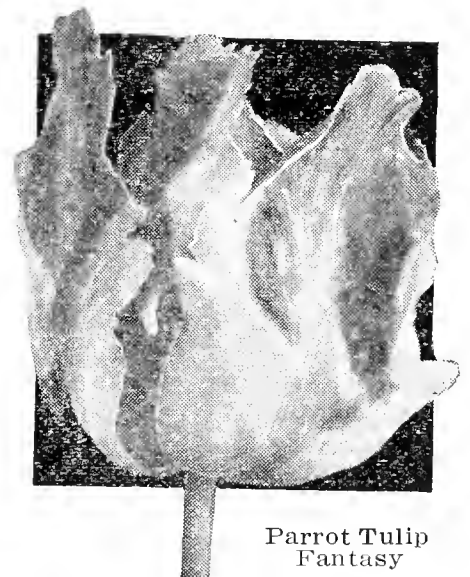

Every good grower knows that the results from bulbs are in direct proportion to the quality of the goods. This is the reason why our many florist customers insist on having the finest bulbs obtainable. They know that they must produce flowers that will sell at good prices even during times when the market is flooded with flowers of average quality. All Dreer bulbs have been carefully selected for size and vigor. They are bound to give entire satisfaction if grown properly. Naturally the price for these large bulbs is somewhat higher than that of smaller sizes, yet the difference is insignificant if one considers the chance taken by the grower who tries to get by with inferior stock.

Double Flowering Narcissus

The Double Narcissus have shown a decided increase in popularity during recent years. This is entirely due to their splendid qualities which make them valuable for garden display and for cutting. With the exception of Van Sion the blooms are double by the addition of a liberal number of perianth petals. In Van Sion, however, we have a trumpet variety with a single set of perianth petals and a double trumpet in the center. All are easy to grow, though Alba plena odorata demands more exacting conditions in order to unfold its blooms.

Poetaz Narcissus

The Poetaz Narcissus also are known as Cluster-Flowered Daffodils because they produce several showy flowers atop each stem. Jonquils

The Jonquils though the smallest are also the sweetest of all Narcissus. They are highly prized for their graceful golden yellow blooms that are most effective in borders or naturalized in grass. Their dwarf habit makes them valuable for the rock garden.

Campernelle Double. A splendid double-flowered variety with lovely rich golden yellow blooms of elegant form borne on graceful stiff stems. You will be delighted with the rich perfume of this attractive variety. 65c per doz.; \$4.50 per 100.

Single Sweet Scented. This is the charming "Jonquilla simplex" of ancient history, carrying 3 to 8 golden yellow florets on a fine wiry stem. The most fragrant of them all. Round bulbs 75c per doz.; \$5.00 per 100.

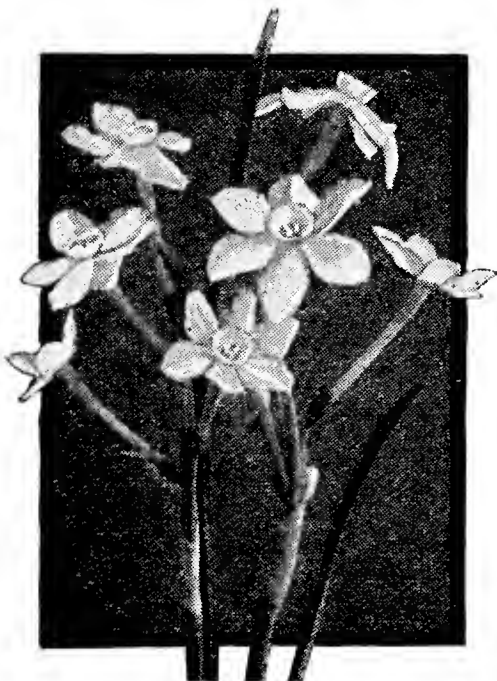

Narcissus Mixtures

These mixtures are composed of really worth-while varieties and do not represent surplus stock. For that reason they give a colorful and well balanced display.

Chalice Cup Mixed. This mixture includes only the so-called Chalice Cup or Short Cupped varieties which are so popular for mass planting and naturalizing because they are hardy and long lived. 60c per doz.; \$3.50 per 100; \$28.00 per 1000.

Red-Crown Varieties. The red-crowned varieties of Daffodils are particular favorites because they give a splendid color effect in the garden. Our mixture includes only the very finest sorts. 65c per doz.; \$4.25 per 100; \$35.00 per 1000.

General Mixture of All Types. As diverse a mixture as can be made including an exceptionally wide range of varieties which are perfectly hardy and will give a beautiful display. Should be planted in quantity for liberal cutting. 60c per doz.; \$4.00 per 100; \$30.00 per 1000.

Corchorus japonicus fl. pl.

Corchorus—Kerria—Globeflower

Japonicus fl. pl. This is a particularly valuable shrub because it combines many showy features. The habit of the plant is most graceful and the light green serrated leaves add much to its beauty. From June to October the bushes are covered with attractive, double, golden yellow flowers which are unlike those of any other shrubs. But even during the winter the bright green stems add a distinctive note to the garden. The plants grow about 6 feet high. We offer an exceptionally fine lot of field grown plants, \$3.50 per doz.; \$25.00 per 100.

Cotoneaster

Very ornamental shrubs with decorative fruits remaining usually throughout the winter. The dwarf varieties are nearly evergreen and while especially adapted for rockery plantings are equally effective planted in clumps in front of the shrubby border or mixed with the dwarf broad-leaved evergreens.

Francheti. Tall, upright, densely branched shrub with spreading branches. Fruit orange-red; semi-evergreen.

Horizontalis. A low growing shrub with almost horizontal branches. Small shiny green leaves and orange-red berries produced in great quantity. One of the most effective evergreen plants for rockery or border planting.

Praecox. A new Chinese variety with glossy foliage and large red berries by the end of June.

Salicifolia floccosa. A large growing shrub of graceful habit and willow-like foliage, bright red fruits extending well along the branches.

Any of the above varieties in strong, 4-inch pots: 50c each; \$5.00 per doz.

Erica—Heath

Most of these Heaths are compact, low-growing, and extremely useful for rockeries. The small foliage is densely arranged around the wiry stems, and both in full bloom or in mid-winter they make a very pretty picture. Give some protection the first winter to acclimate them. Semi-shady location.

Vagans (Cornish Heath). Compact evergreen shrub with dark green small foliage and pale purplish red flowers in August and September; 12 inches. A good rock plant for a semi-shaded position.

Vulgaris (Calluna vulgaris). (Scotch Heather.) A dense-growing shrub with erect branches covered with short, closely lapped leaves. The pretty, bell-shaped flowers are rosy lavender and occur in great profusion toward the tops of the shoots.

— **alba.** Pure white.

— **aurea.** A pretty gold leaved form of the white variety.

— **rubra.** Rosy carmine.

Any of the above varieties, 4-inch pots: 40c each; \$4.00 per doz.; \$30.00 per 100.

Nandina domestica—Chinese Bamboo

A very handsome small shrub, hardy as far north as Philadelphia. It grows about three feet high and has graceful, light green foliage which turns to a most attractive bronzy red early in the fall. The small white flowers are produced in good-sized erect panicles in spring and they are followed by crimson berries. Strong 5-inch pots, 50c each; \$5.00 per doz.

Osmanthus—Holly Osmanthus

Aquifolium. A beautiful, strong growing, Holly-like shrub with evergreen dark green, shiny, crinkly, spiny-toothed foliage. Attractive not only in summer but throughout the winter. Naturally grows in a shapely bushy form, usually from 5 to 8 feet high. Strong plants, 15 to 18 inches high, \$1.00 each.

Privet—Golden Variegated California

Three-year-old bushy plants, 24 to 30 inches high, \$3.00 per doz.; \$20.00 per 100.

Pyracantha (Crataegus) coccinea Lalandi
Firethorn, Evergreen Thorn

There is no other fruiting evergreen shrub that is so attractive throughout the year as this Firethorn. It will succeed in any fairly sunny position, developing into a shapely plant 6 feet or more high. May be planted either in connection with other shrubs, as a single specimen, or may be trained with wonderful effect against a wall. Its large trusses of white flowers are followed in summer by an abundance of brilliant orange-scarlet berries, which, remaining on the plants throughout the winter, produce a gorgeous effect. Strong 5-inch pots, 75c each.

Viburnum Carlesi—Fragrant Viburnum

A rare Korean variety which is entirely distinct. Has sweet-scented salver-shaped flowers of a delicate rose-tinted white, passing to white. The flowers are produced in May in terminal subglobose cymes 2 to 3 inches in diameter. Good bushy specimens 2 feet high, 75c each.

Viburnum rhytidophyllum

A rare variety, particularly attractive on account of its large, dark green, nearly evergreen foliage. The yellowish white flowers are followed in September by red berries which finally turn black. 4-inch pots, 50c each.

Vitex macrophylla
The Rare Chaste Tree

Vitex macrophylla—The Rare Chaste Tree

In general habit similar to *V. Agnus-castus* but much stronger in all parts, the foliage being larger while the trusses of rich lavender-blue flowers are fully double the size. It blooms from July until frost, and is likely to become as popular as the Butterfly Shrub. Field-grown plants, two-year-old, \$3.50 per doz.; \$25.00 per 100.
